INDEX TO AUTHORS

ABRAMS, IRVING. See SOLLNER, ABRAMS, and CARR, 7
—. See SOLLNER, CARR, and ABRAMS, 411
ANSON, M. L. Some factors which influence the oxidation of sulfhydryl groups, 355

BALE, WILLIAM F. See FENN, BALE, and MULLINS, 345
BARTH, L. G., and KIRK, PAUL L. A simplified differential microrespirometer, 663
BERGMANN, MAX. See IRVING, FRUTON, and BERGMANN, 669
BERNAL, J. D., and FANKUCHEN, I. X-ray and crystallographic studies of plant virus preparations. I. Introduction and preparation of specimens. II. Modes of aggregation of the virus particles, 111
— and —. X-ray and crystallographic studies of plant virus preparations. III, 147
BLINKS, L. R. The relations of temperature to the potassium effect and the bioelectric potential of *Valonia*, 905
BOURDILLON, JAQUES. Analytical diffusion of influenza virus and mouse encephalomyelitis virus, 263
BRAND, ERWIN, and KASSELL, BEATRICE. Determination of certain amino acids in chymotrypsinogen, and its molecular weight, 167
BROYER, T. C. See HOAGLAND and BROYER, 865
BRUES, AUSTIN M. See WILSON, JACKSON, and BRUES, 689

CARR, CHARLES W. See SOLLNER, ABRAMS, and CARR, 7
—. See SOLLNER, CARR, and ABRAMS, 411
CASTOR, JOHN G. B. See STIER and CASTOR, 229
CHASE, AURIN M. See SHLAER, SMITH, and CHASE, 553
CIACCI, VINCENT W. See MILLER and CIACCI, 597
CLOWES, G. H. A. See HUTCHENS, KELTCH, KRAHL, and CLOWES, 717
—. See KRAHL, JANDORF, and CLOWES, 733
COATES, C. W. See NACHMANSOHN, COATES, and COX, 75
COHN, ROBERT. A cycloscopic study of the human electroencephalogram, 517
COLE, KENNETH S. Rectification and inductance in the squid giant axon, 29
— and GUTTMAN, RITA M. Electric impedance of the frog egg, 765
COLE, WILLIAM H. A perfusing solution for the lobster (*Homarus*) heart and the effects of its constituent ions on the heart, 1
COX, R. T. See NACHMANSOHN, COATES, and COX, 75
CROZIER, W. J., and WOLF, ERNST. Theory and measurement of visual mechanisms. VI. Wave length and flash duration in flicker, 89
— and —. VII. The flicker response function outside the fovea, 293
— and —. VIII. The form of the flicker contour, 369
— and —. The wave length sensitivity function for the zebra finch, 381

EMERSON, ROBERT, and LEWIS, CHARLTON M. The photosynthetic efficiency of phycocyanin in

Chroococcus, and the problem of carotenoid participation in photosynthesis, 579

FANKUCHEN, I. See BERNAL and FANKUCHEN, 111, 147

FENN, W. O., BALE, WILLIAM F., and MULLINS, LORIN J. The radioactivity of potassium from human sources, 345

FERGUSON, JOHN H. The flocculation maximum (pH) of fibrinogen and some other blood-clotting reagents. (Relative turbidimetry with the Evelyn photoelectric colorimeter), 607

FISHMAN, MYER, and MOYER, LAURENCE S. The chlorophyll-protein complex. I. Electrophoretic properties and isoelectric point, 755

FRANCK, J., and FRENCH, C. S. Photoxidation processes in plants, 309

FRENCH, C. S. See FRANCK and FRENCH, 309

FRUTON, JOSEPH S. See IRVING, FRUTON, and BERGMANN, 669

GLAUBACH, SUSI. See GLICK and GLAUBACH, 197

GLICK, DAVID, and GLAUBACH, SUSI. The occurrence and distribution of atropinesterase, and the specificity of tropinesterases, 197

GOODMAN, H. C. See WALD, HARPER, GOODMAN, and KRIEGER, 891

GORIN, MANUEL H., and MOYER, LAURENCE S. The valence of corpuscular proteins, 785

GRANICK, SAM. Some properties of crystalline guinea pig hemoglobin, 571

—. See MICHAELIS and GRANICK, 325

GUTTMAN, RITA M. See COLE and GUTTMAN, 765

HARPER, P. V., JR. See WALD, HARPER, GOODMAN, and KRIEGER, 891

HARVEY, E. NEWTON. Hydrostatic pressure and temperature in relation to stimulation and cyclosis in *Nitella flexilis*, 855

—. Stimulation of cells by intense flashes of ultraviolet light, 431

HECHT, SELIG, SHLAER, SIMON, and PIRENNE, MAURICE HENRI. Energy, quanta, and vision, 819

HEIDELBERGER, MICHAEL, and TREFFERS, HENRY P. Quantitative chemical studies on hemolysins. I. The estimation of total antibody in antisera to sheep erythrocytes and stromata, 523

HERRIOTT, ROGER M. Inactivation of pepsin by iodine. II. Isolation of crystalline *l*-mono-iodotyrosine from partially iodinated pepsin, 185

HOAGLAND, D. R., and BROYER, T. C. Accumulation of salt and permeability in plant cells, 865

HOAGLAND, HUDSON, and PINCUS, GREGORY. Revival of mammalian sperm after immersion in liquid nitrogen, 337

HÖBER, JOSEPHINE. See HÖBER and HÖBER, 705

HÖBER, RUDOLF, and HÖBER, JOSEPHINE. The influence of detergents on some physiological phenomena, especially on the properties of the stellate cells of the frog liver, 705

HUTCHENS, JOHN O., KELTCH, A. K., KRAHL, M. E., and CLOWES, G. H. A. Studies on cell metabolism and cell division. VI. Observations on the glycogen content, carbohydrate consumption, lactic acid production, and ammonia production of eggs of *Arbacia punctulata*, 717

IRVING, GEORGE W., JR., FRUTON, JOSEPH S., and BERGMANN, MAX. The activation of papain trypsinase as a function of the nature of the activator, 669

JACKSON, ELIZABETH B. See WILSON, JACKSON, and BRUES, 689

JACOBS, M. H., and STEWART, DOROTHY R. The rôle of carbonic anhydrase in certain ionic exchanges involving the erythrocyte, 539

JANDORF, BERNHARD J., and KRAHL, M. E. Studies on cell metabolism and cell division. VIII. The diphosphopyridine nucleotide (cozymase) content of eggs of *Arbacia punctulata*, 749

—. See KRAHL, JANDORF, and CLOWES, 733

KAMIN, HENRY. See WAGREICH, SCHWARTZ, and KAMIN, 207

KASSELL, BEATRICE. See BRAND and KASSELL, 167

KELTCH, A. K. See HUTCHENS, KELTCH, KRAHL, and CLOWES, 717

KIRK, PAUL L. See BARTH and KIRK, 663

KRAHL, M. E., JANDORF, BERNHARD J., and CLOWES, G. H. A. Studies on cell metabolism and cell division. VII. Observations on the amount and possible function of diphosphothiamine (cocarboxylase) in eggs of *Arbacia punctulata*, 733

—. See HUTCHENS, KELTCH, KRAHL, and CLOWES, 717

—. See JANDORF and KRAHL, 749

KRIEGER, H. P. See WALD, HARPER, GOODMAN, and KRIEGER, 891

KUNITZ, M. See MCDONALD and KUNITZ, 53

LEWIS, CHARLTON M. See EMERSON and LEWIS, 579

LONGSWORTH, LEWIS G., and MACINNES, D. A. An electrophoretic study of mixtures of ovalbumin and yeast nucleic acid, 507

LORING, HUBERT S. The reversible inactivation of tobacco mosaic virus by crystalline ribonuclease, 497

LUCKÉ, BALDUIN, and RICCA, R. A. Osmotic properties of the egg cells of the cyster (*Ostrea virginica*), 215

MACINNES, D. A. See LONGSWORTH and MACINNES, 507

MARSHAK, A. P_{32} uptake by nuclei, 275

MARZULLI, FRANCIS N. The effects of hydrogen ion concentration upon the metamorphic pattern of thyroxin- and iodine-treated tadpoles, 623

MCDONALD, MARGARET R., and KUNITZ, M. The effect of calcium and other ions on the autocatalytic formation of trypsin from trypsinogen, 53

MICHAELIS, L., and GRANICK, S. The magnetic behavior of catalase, 325

MILLER, BERNARD J., and CIACCI, VINCENT W. The physiological effects of *l*-tyrosine and *l*-phenylalanine on the rate and quality of pulsation in the seventy-two hour extirpated embryonic chick heart, 597

MILSTONE, H. Purification of thrombin, 679

MOYER, LAURENCE S. See FISHMAN and MOYER, 755

—. See GORIN and MOYER, 785

MUDD, STUART. See SEVAG, SHELBURNE, and MUDD, 805

VOGLER, K. G. The presence of an endogenous respiration in the autotrophic bacteria, 617

WAGREICH, HARRY, SCHWARTZ, LAWRENCE I., and KAMIN, HENRY. The influence of proteins

on the reactivation of yeast invertase, 207
WALD, GEORGE. The visual system and vitamins A of the sea lamprey, 331
—. The visual systems of euryhaline fishes, 235
—, HARPER, P. V., JR., GOODMAN, H. C., and KRIEGER, H. P. Respiratory effects upon the visual threshold, 891
WHITAKER, D. M. Counteracting the retarding and inhibitory effects of strong ultraviolet on *Fucus* eggs by white light, 391
WILLIAMS, ROGER J. See TEAGUE and WILLIAMS, 777
WILSON, HILDEGARD, JACKSON, ELIZABETH B., and BRUES, AUSTIN M. The metabolism of tissue cultures. I. Preliminary studies on chick embryo, 689
WOLF, ERNST. See CROZIER and WOLF, 89, 293, 369, 381
WYND, F. LYLE. Certain enzymatic activities of normal and mosaic-infected tobacco plants, 649

ZUCKER, LOIS, and ZUCKER, THEODORE F. A simple time weight relation observed in well nourished rats, 445
ZUCKER, THEODORE F. See ZUCKER and ZUCKER, 445

INDEX TO SUBJECTS

ACID, lactic, production, and glycogen content, carbohydrate consumption, and ammonia production of *Arbacia punctulata* eggs, 717

—, pantothenic, and utilization of glucose by living and cell-free systems, 777

—, yeast nucleic, and ovalbumin, mixtures, electrophoretic study, 507

Acids, amino, determination in chymotrypsinogen and its molecular weight, 167

Alanine, *l*-phenyl-, and *l*-tyrosine, physiological effects on rate and quality of pulsation in extirpated embryonic chick heart, 597

Amino acids, determination in chymotrypsinogen and its molecular weight, 167

Ammonia production, glycogen content, carbohydrate consumption, and lactic acid production of *Arbacia punctulata* eggs, 717

Anhydrase, carbonic, rôle in ionic exchanges involving erythrocyte, 539

Antibody, total, in antisera to sheep erythrocytes and stromata, 523

Antisera to sheep erythrocytes and stromata, total antibody in, 523

Antitoxin, diphtheria, purification and crystallization, 465

—, diphtheria, purified, in ultracentrifuge and in electrophoresis apparatus, 487

Apparatus, electrophoresis, purified diphtheria antitoxin in, 487

Arbacia punctulata eggs, amount and possible function of diphosphothiamine, 733

— *punctulata* eggs, diphosphopyridine nucleotide content, 749

Arbacia punctulata eggs, glycogen content, carbohydrate consumption, lactic acid production, and ammonia production, 717

Atropinesterase, occurrence and distribution, and specificity of tropinesterases, 197

Autocatalytic formation of trypsin from trypsinogen, effect of calcium and other ions, 53

Autotrophic bacteria, endogenous respiration, 617

Auxins, effect on protoplasmic streaming, 841

Axon, giant, squid, rectification and inductance, 29

BACTERIA, autotrophic, endogenous respiration, 617

Bacterial and yeast carboxylases, inhibition by sulfonamide drugs structurally related to cocarboxylase, 805

Bioelectric potential and potassium effect of *Valonia*, relations of temperature, 905

Blood corpuscle, red. *See* Erythrocyte.

Blood-clotting reagents and fibrinogen, flocculation maximum (pH), relative turbidimetry with Evelyn photoelectric colorimeter, 607

CALCIUM and other ions, effect on autocatalytic formation of trypsin from trypsinogen, 53

Carbohydrate consumption, glycogen content, lactic acid production, and ammonia production of *Arbacia punctulata* eggs, 717

Carbonic anhydrase, rôle in ionic exchanges involving erythrocyte, 539

Carboxylase, co-, amount and possible function in *Arbacia punctulata* eggs, 733

Carboxylase, co-, sulfonamide drugs structurally related to, inhibition of bacterial and yeast carboxylases by, 805
Carboxylases, bacterial and yeast, inhibition by sulfonamide drugs structurally related to cocarboxylase, 805
Carotenoid participation in photosynthesis, photosynthetic efficiency of phycocyanin in *Chroococcus*, 579
Catalase, magnetic behavior, 325
Catalysis, auto-, formation of trypsin from trypsinogen, effect of calcium and other ions, 53
Catfishes, peripherally stored neurohumors, activity, 177
Cell, blood, red. *See* Erythrocyte.
— metabolism and cell division, 717, 733, 749
Cell-free and living systems, pantothenic acid and utilization of glucose by, 777
Cells, egg, *Ostrea virginica*, osmotic properties, 215
—, plant, accumulation of salt and permeability, 865
—, stellate, of frog liver, properties, influence of detergents, 705
—, stimulation by intense flashes of ultraviolet light, 431
—, x-ray effects, mechanisms, 533
Centrifuge, ultra-, purified diphtheria antitoxin in, 487
Chemical studies, quantitative, on nemolysins, total antibody in antisera to sheep erythrocytes and stromata, 523
Chlorophyll-protein complex, electrophoretic properties and isoelectric point, 755
Choline esterase, activity, and electric potential, in electric organ of *Electrophorus electricus* Linnaeus, 75
Chroococcus, phycocyanin in, photosynthetic efficiency, and carotenoid participation in photosynthesis, 579
Chymotrypsinogen, determination of amino acids in, and its molecular weight, 167
Clotting, blood-, reagents, and fibrinogen, flocculation maximum (pH), relative turbidimetry with Evelyn photoelectric colorimeter, 607
Cocarboxylase, amount and possible function in *Arbacia punctulata* eggs, 733
—, sulfonamide drugs structurally related to, inhibition of bacterial and yeast carboxylases by, 805
Collodion membrane, activated, structure and electrical behavior, 7
— membrane, structure and electrical behavior, and base exchange properties of collodion, 411
Colorimeter, photoelectric, Evelyn, relative turbidimetry with, flocculation maximum (pH) of fibrinogen and blood-clotting reagents, 607
Corpuscle, red. *See* Erythrocyte.
Corpuscular proteins, valence, 785
Cozymase content of *Arbacia punctulata* eggs, 749
Crystallization and purification of diphtheria antitoxin, 465
Crystallographic and x-ray studies of plant virus preparations, 147
— and x-ray studies of plant virus preparations, preparation of specimens and modes of aggregation of virus particles, 111
Cultures, tissue, metabolism, chick embryo, 689
Cycloscopic study of human electroencephalogram, 517
Cyclosis and stimulation in *Nitella flexilis*, hydrostatic pressure and temperature in relation to, 855

DETERGENTS, influence on properties of stellate cells of frog liver, 705
Diffusion, analytical, of influenza virus and mouse encephalomyelitis virus, 263
Diphosphopyridine nucleotide content of *Arbacia punctulata* eggs, 749
Diphosphothiamine, amount and possible function in *Arbacia punctulata* eggs, 733
Diphtheria antitoxin, purification and crystallization, 465
— antitoxin, purified, in ultracentrifuge and in electrophoresis apparatus, 487
Drugs, sulfonamide, structurally related to cocarboxylase, inhibition of bacterial and yeast carboxylases by, 805

EGG cells, *Ostrea virginica*, osmotic properties, 215
—, frog, electric impedance, 765
Eggs, *Arbacia punctulata*, amount and possible function of diphosphothiamine, 733
—, *Arbacia punctulata*, diphosphopyridine nucleotide content, 749
—, *Arbacia punctulata*, glycogen content, carbohydrate consumption, lactic acid production, and ammonia production, 717
—, *Fucus*, retarding and inhibitory effects of strong ultraviolet, counteracted by white light, 391
Electric impedance of frog egg, 765
Electric potential and activity of choline esterase in electric organ of *Electrophorus electricus* Linnaeus, 75
— potential and potassium effect of *Valonia*, relations of temperature, 905
Electrical behavior and structure of activated collodion membrane, 7
— behavior and structure of collodion membrane and base exchange properties of collodion, 411
Electroencephalogram, human, cycloscopic study, 517
Electrophoresis apparatus, purified diphtheria antitoxin in, 487
Electrophoretic properties and isoelectric point of chlorophyll-protein complex, 755
— study of ovalbumin and yeast nucleic acid mixtures, 507
Electrophorus electricus Linnaeus, electric organ, electric potential and activity of choline esterase in, 75
Embryo, chick, tissue cultures, metabolism, 689
Embryonic chick heart, extirpated, pulsation, rate and quality, physiological effects of *l*-tyrosine and *l*-phenylalanine, 597
Encephalogram, electro-, human, cycloscopic study, 517
Encephalomyelitis virus, mouse, and influenza virus, analytical diffusion, 263
Endogenous respiration in autotrophic bacteria, 617
Energy, quanta, and vision, 819
Enzymatic activities of normal and mosaic-infected tobacco plants, 649
Erythrocyte, ionic exchanges involving, rôle of carbonic anhydrase, 539
Erythrocytes and stromata, sheep, total antibody in antisera to, 523
Esterase, choline, activity, and electric potential, in electric organ of *Electrophorus electricus* Linnaeus, 75
Euryhaline fishes, visual systems, 235

FIBRINOGEN and blood-clotting reagents, flocculation maximum (pH), relative turbidimetry with Evelyn photoelectric colorimeter, 607

Finch, zebra, wave length sensitivity function for, 381
Fishes, euryhaline, visual systems, 235
Flocculation maximum, hydrogen ion concentration, of fibrinogen and blood-clotting reagents, relative turbidimetry with Evelyn photoelectric colorimeter, 607
Fovea, flicker response function outside, 293
Fucus eggs, retarding and inhibitory effects of strong ultraviolet counteracted by white light, 391

GLUCOSE utilization by living and cell-free systems, and pantothenic acid, 777
Glycogen content, carbohydrate consumption, lactic acid production, and ammonia production of *Arbacia punctulata* eggs, 717

HEART, chick, embryonic, extirpated, physiological effects of *l*-tyrosine and *l*-phenylalanine on rate and quality of pulsation, 597
—, *Homarus*, perfusing solution, effects of constituent ions, 1
Hemoglobin, crystalline, guinea pig, properties, 571
Hemolysins, quantitative chemical studies, total antibody in antisera to sheep erythrocytes and stromata, 523
Hemolysis, acceleration, effect of temperature and lysin concentration, 247
Homarus heart, perfusing solution, effects of constituent ions, 1
Hydrogen ion concentration, effects upon metamorphic pattern of thyroxin- and iodine-treated tadpoles, 623
— ion concentration, flocculation maximum of fibrinogen and blood-clotting reagents, relative turbidimetry with Evelyn photoelectric colorimeter, 607
Hydrostatic pressure and temperature in relation to stimulation and cyclosis in *Nitella flexilis*, 855

IMPEDANCE, electric, of frog egg, 765
Inductance and rectification in squid giant axon, 29
Influenza virus and mouse encephalomyelitis virus, analytical diffusion, 263
Invertase, yeast, activity as function of oxidation-reduction potential, 399
—, yeast, reactivation, influence of proteins, 207
Iodine, inactivation of pepsin by, isolation of crystalline *l*-monoiodotyrosine from partially iodinated pepsin, 185
Iodine- and thyroxin-treated tadpoles, metamorphic pattern, effects of hydrogen ion concentration, 623
Ionic exchanges involving erythrocyte, rôle of carbonic anhydrase, 539
Ions, constituent, of perfusing solution for *Homarus* heart, effects, 1
—, effect on autocatalytic formation of trypsin from trypsinogen, 53
Isoelectric point and electrophoretic properties of chlorophyll-protein complex, 755

LACTIC acid production, glycogen content, carbohydrate consumption, and ammonia production of *Arbacia punctulata* eggs, 717
Lamprey, visual system and vitamins A, 331
Light, ultraviolet, intense flashes, stimulation of cells by, 431
—, white, counteracting retarding and inhibitory effects of strong ultraviolet on *Fucus* eggs, 391
Liver, frog, stellate cells, properties, influence of detergents, 705

Lobster heart, perfusing solution, effects of constituent ions, 1
Lysin concentration and temperature, effect on acceleration of hemolysis, 247

MAGNETIC behavior of catalase, 325
Mammalian sperm, revival after immersion in liquid nitrogen, 337
Man, electroencephalogram, cycloscopic study, 517
—, radioactivity of potassium from, 345
Membrane, collodion, activated, structure and electrical behavior, 7
—, collodion, structure and electrical behavior, and base exchange properties of collodion, 411
Metabolic organization, *in vivo*, production and use of permanently altered strains of yeast for studies of, 229
Metabolism, cell, and cell division, 717, 733, 749
— of tissue cultures, chick embryo, 689
Metamorphic pattern of thyroxin- and iodine-treated tadpoles, effects of hydrogen ion concentration, 623
Microrespirometer, differential, simplified, 663
Molecular weight of chymotrypsinogen, and determination of amino acids in, 167
Monoiodotyrosine, *l*-, crystalline, isolation from partially iodinated pepsin, 185
Mosaic virus, tobacco, containing radioactive phosphorus, preparation and use, 881
— virus, tobacco, reversible inactivation by crystalline ribonuclease, 497
Mosaic-infected and normal tobacco plants, enzymatic activities, 649

NEUROHUMORS in catfishes, peripherally stored, activity, 177
Nitella flexilis, stimulation and cyclosis in, hydrostatic pressure and temperature in relation to, 855
Nitrogen, liquid, revival of mammalian sperm after immersion in, 337
Nuclease, ribo-, crystalline, reversible inactivation of tobacco mosaic virus by, 497
Nuclei, radioactive phosphorus uptake by, 275
Nucleic acid, yeast, and ovalbumin, mixtures, electrophoretic study, 507
Nucleotide, diphosphopyridine, content of *Arbacia punctulata* eggs, 749

ORGAN, electric, of *Electrophorus electricus* Linnaeus, electric potential and activity of choline esterase in, 75
Osmotic properties of *Ostrea virginica* egg cells, 215
Ostrea virginica, egg cells, osmotic properties, 215
Ovalbumin and yeast nucleic acid, mixtures, electrophoretic study, 507
Oxidation of sulfhydryl groups, 355
—, photo-, processes, in plants, 309
Oxidation-reduction potential, activity of yeast invertase as function of, 399
Oyster, egg cells, osmotic properties, 215

PANTOTHENIC acid and utilization of glucose by living and cell-free systems, 777
Papain trypsinase, activation as function of nature of activator, 669
Pepsin, inactivation by iodine, isolation of crystalline *l*-monoiodotyrosine from partially iodinated pepsin, 185

Perfusion solution for lobster heart, effects of constituent ions, 1
Permeability and salt accumulation in plant cells, 865
Phenylalanine, *l*-, and *l*-tyrosine, physiological effects on rate and quality of pulsation in extirpated embryonic chick heart, 597
Phosphorus, radioactive, preparation and use of tobacco mosaic virus containing, 881
—, radioactive, uptake by nuclei, 275
Photoelectric colorimeter, Evelyn, relative turbidimetry with, flocculation maximum (pH) of fibrinogen and blood-clotting reagents, 607
Photosynthetic efficiency of phycocyanin in *Chroococcus*, carotenoid participation in photosynthesis, 579
Photoxidation processes in plants, 309
Phycocyanin in *Chroococcus*, photosynthetic efficiency, carotenoid participation in photosynthesis, 579
Physiological effects of *l*-tyrosine and *l*-phenylalanine on rate and quality of pulsation in extirpated embryonic chick heart, 597
— phenomena, influence of detergents on properties of stellate cells of frog liver, 705
Plant cells, accumulation of salt and permeability, 865
— virus preparations, x-ray and crystallographic studies, 147
— virus preparations, x-ray and crystallographic studies, preparation of specimens and modes of aggregation of virus particles, 111
Plants, photoxidation processes, 309
—, tobacco, normal, and mosaic-infected, enzymatic activities, 649
Potassium effect and bioelectric potential of *Valonia*, relations of temperature, 905
Potassium from human sources, radioactivity, 345
Potential, bioelectric, and potassium effect, of *Valonia*, relations of temperature, 905
—, electric, and activity of choline esterase, in electric organ of *Electrophorus electricus* Linnaeus, 75
—, oxidation-reduction, activity of yeast invertase as function of, 399
Pressure, hydrostatic, and temperature in relation to stimulation and cyclosis in *Nitella flexilis*, 855
Protein-chlorophyll complex, electrophoretic properties and isoelectric point, 755
Proteins, corpuscular, valence, 785
—, influence on reactivation of yeast invertase, 207
Protoplasmic streaming, effect of auxins, 841
Pulsation in extirpated embryonic chick heart, physiological effects of *l*-tyrosine and *l*-phenylalanine on rate and quality, 597
Pyridine, diphospho-, nucleotide, content of *Arbacia punctulata* eggs, 749

QUANTA, energy, and vision, 819

RADIOACTIVE phosphorus, preparation and use of tobacco mosaic virus containing, 881
— phosphorus, uptake by nuclei, 275
Radioctivity of potassium from human sources, 345
Rectification and inductance in squid giant axon, 29
Reduction-oxidation potential, activity of yeast invertase as function of, 399
Respiration, endogenous, in autotrophic bacteria, 617
— of bacteria and yeast, action of sulfonamides, 805

Respiratory effects upon visual threshold, 891
Respirometer, micro-, differential, simplified, 663
Ribonuclease, crystalline, reversible inactivation of tobacco mosaic virus by, 497
Roentgen ray and crystallographic studies of plant virus preparations, 147
— ray and crystallographic studies of plant virus preparations, preparation of specimens, and modes of aggregation of virus particles, 111
— ray effects on cells, mechanisms, 533

SALT, accumulation, and permeability, in plant cells, 865
Sensitivity function, wave length, for zebra finch, 381
Sheep erythrocytes and stromata, total antibody in antisera to, 523
Spectrum, different regions, visual acuity and illumination, 553
Sperm, mammalian, revival after immersion in liquid nitrogen, 337
Squid giant axon, rectification and inductance, 29
Stimulation and cyclosis in *Nitella flexilis*, hydrostatic pressure and temperature in relation to, 855
— of cells by intense flashes of ultraviolet light, 431
Streaming, protoplasmic, effect of auxins, 841
Stromata and erythrocytes, sheep, total antibody in antisera to, 523
Sulfhydryl groups, oxidation, 355
Sulfonamides, action on respiration of bacteria and yeast, 805

TADPOLES, thyroxin- and iodine-treated, metamorphic pattern, effects of hydrogen ion concentration, 623
Temperature and hydrostatic pressure in relation to stimulation and cyclosis in *Nitella flexilis*, 855
— and lysin concentration, effect on acceleration of hemolysis, 247
—, relations to potassium effect and bioelectric potential of *Valonia*, 905
Thiamine, diphospho-, amount and possible function in *Arbacia punctulata* eggs, 733
Thrombin, purification, 679
Thyroxin- and iodine-treated tadpoles, metamorphic pattern, effects of hydrogen ion concentration, 623
Time-weight relation, simple, observed in well nourished rats, 445
Tissue cultures, metabolism, chick embryo, 689
Tobacco mosaic virus containing radioactive phosphorus, preparation and use, 881
— mosaic virus, reversible inactivation by crystalline ribonuclease, 497
— plants, normal and mosaic-infected, enzymatic activities, 649
Tropinesterases, specificity, and occurrence and distribution of atropinesterase, 197
Trypsin, autocatalytic formation from trypsinogen, effect of calcium and other ions, 53
Trypsinase, papain, activation as function of nature of activator, 669
Trypsinogen, effect of calcium and other ions on autocatalytic formation of trypsin from, 53
Turbidimetry, relative, with Evelyn photoelectric colorimeter, flocculation maximum (pH) of fibrinogen and blood-clotting reagents, 607
Tyrosine, *l*-monoiodo-, crystalline, isolation from partially iodinated pepsin, 185

Tyrosine, *l*-, and *l*-phenylalanine, physiological effects on rate and quality of pulsation in extirpated embryonic chick heart, 597

ULTRACENTRIFUGE, purified diphtheria antitoxin in, 487

Ultraviolet light, intense flashes, stimulation of cells by, 431

—, strong, retarding and inhibitory effects on *Fucus* eggs, counteracted by white light, 391

VALENCE of corpuscular proteins, 785

Valonia, potassium effect and bioelectric potential, relations of temperature, 905

Virus, influenza, and mouse encephalomyelitis, analytical diffusion, 263

—, plant, preparations, x-ray and crystallographic studies, 147

—, plant, preparations, x-ray and crystallographic studies, preparation of specimens and modes of aggregation of virus particles, 111

—, tobacco mosaic, containing radioactive phosphorus, preparation and use, 881

—, tobacco mosaic, reversible inactivation by crystalline ribonuclease, 497

Vision, acuity, and illumination in different spectral regions, 553

—, energy, and quanta, 819

Vision, mechanisms, theory and measurement, flicker response function outside fovea, 293

—, mechanisms, theory and measurement, form of flicker contour, 369

—, mechanisms, theory and measurement, wave length and flash duration in flicker, 89

—, systems of euryhaline fishes, 235

—, threshold, respiratory effects, 891

— and vitamins A of sea lamprey, 331

Vitamins A and visual system of sea lamprey, 331

WEIGHT-TIME relation, simple, observed in well nourished rats, 445

X-RAY. *See* Roentgen ray.

YEAST and bacterial carboxylases, inhibition by sulfonamide drugs structurally related to cocarboxylase, 805

— invertase, activity as function of oxidation-reduction potential, 399

— invertase, reactivation, influence of proteins, 207

— nucleic acid and ovalbumin, mixtures, electrophoretic study, 507

— strains, permanently altered, production and use for *in vivo* metabolic organization studies, 229

No. 2. WILLIAM TRAVIS HOWARD and OSCAR T. SCHULTZ. Studies in the biology of tumor cells. Plates 1–6. (Issued February 15, 1911.) Price, $1.00.

No. 3. BENJAMIN T. TERRY. Chemo-therapeutic trypanosome studies with special reference to the immunity following cure. (Issued March 15, 1911.) Price, $1.00.

No. 4. FRANCIS W. PEABODY, GEORGE DRAPER, and A. R. DOCHEZ. A clinical study of acute poliomyelitis. Plates 1–13. (Issued June 14, 1912.) Price, $1.00.

*No. 5. J. P. SIMONDS. Studies in *Bacillus welchii*, with special reference to classification and to its relation to diarrhea. (Issued September 27, 1915.) Price, $1.00.

*No. 6. JAMES L. STODDARD and ELLIOTT C. CUTLER. Torula infection in man. Plates 1–9. (Issued January 31, 1916.) Price, $1.00.

No. 7. OSWALD T. AVERY, H. T. CHICKERING, RUFUS COLE, and A. R. DOCHEZ. Acute lobar pneumonia. Prevention and serum treatment. Plates 1–3. (Issued October 16, 1917.) Price, $1.00.

*No. 8. ERNEST C. DICKSON. Botulism. A clinical and experimental study. Plates 1–10. (Issued July 31, 1918.) Price, $1.00.

*No. 9. JAMES HOWARD BROWN. The use of blood agar for the study of streptococci. Plates 1–34. (Issued January 21, 1919.) Price, $2.00.

No. 10. WILLIAM G. MACCALLUM. The pathology of the pneumonia in the United States Army camps during the winter of 1917–18. Plates 1–53. (Issued April 16, 1919.) Price, $1.50.

No. 11. FREDERICK M. ALLEN, EDGAR STILLMAN, and REGINALD FITZ. Total dietary regulation in the treatment of diabetes. 62 charts. (Issued October 15, 1919.) Price $4.50.

No. 12. LEWIS H. WEED, PAUL WEGEFORTH, JAMES B. AYER, and LLOYD D. FELTON. A study of experimental meningitis. A series of papers from the Army Neuro-Surgical Laboratory. Plates 1–17. (Issued March 25, 1920.) Price, $1.00.

No. 13. WERNER MARCHAND. The early stages of Tabanidae (horse-flies). Plates 1–15. (Issued November 15, 1920.) Price, $2.00.

No. 14. S. T. DARLING and W. G. SMILLIE. Studies on hookworm infection in Brazil. First paper. (Issued February 1, 1921.) Published for the International Health Division of The Rockefeller Foundation.

No. 15. I. J. KLIGLER. Investigation on soil pollution and the relation of the various types of privies to the spread of intestinal infections. (Issued October 10, 1921.) Published for the International Health Division of The Rockefeller Foundation.

No. 16. ABRAHAM L. GARBAT. Typhoid carriers and typhoid immunity. (Issued May 10, 1922.) Price, $1.25.

No. 17. WILSON G. SMILLIE. Studies on hookworm infection in Brazil. Second paper. (Issued May 12, 1922.) Published for the International Health Division of The Rockefeller Foundation.

No. 18. P. A. LEVENE. Hexosamines, their derivatives, and mucins and mucoids. (Issued July 7, 1922.) Price, $1.25.

No. 19. THEOBALD SMITH and RALPH B. LITTLE. Studies in vaccinal immunity towards disease of the bovine placenta due to *Bacillus abortus* (infectious abortion). (Issued November 15, 1923.) Price, $1.25.

No. 20. HIDEYO NOGUCHI *et al*. Experimental studies of yellow fever in northern Brazil. Plates 1–5. (Issued August 9, 1924.) Published for the International Health Division of The Rockefeller Foundation.

No. 21. JAMES B. MURPHY. The lymphocyte in resistance to tissue grafting, malignant disease, and tuberculous infection. An experimental study. Plates 1–20. (Issued September 20, 1926.) Price, $2.00.

No. 22. HARVEY CUSHING and LEO M. DAVIDOFF. The pathological findings in four autopsied cases of acromegaly with a discussion of their significance. 104 halftones in the text. (Issued April 23, 1927.) Price, $2.00.

No. 23. LOUISE PEARCE. The treatment of human trypanosomiasis with tryparsamide: a critical review. (Issued August 15, 1930.) Price, $2.00.

INDEX TO VOLUME 25 917

The Journal of General Physiology is issued bimonthly, one volume of about 700 pages or more appearing in a year. Contributions should be sent to the Editors of *The Journal of General Physiology*, York Avenue and 66th Street, New York, N. Y. The papers should be limited preferably to twenty printed pages, not counting the space occupied by illustrations. Charts larger than 10 x 12 inches should be accompanied by photographic reproductions, or by tracings which can be folded to the size of the manuscript for convenience in mailing. Papers will be printed as soon as possible after acceptance, but not necessarily in the order in which they are received for publication. Authors can obtain reprints of their papers at cost.

The subscription price per year (one volume) is $5.00, payable in advance. Single copies cost $1.00. Remittances should be made by draft or check on New York, or by postal money order, payable to *The Journal of General Physiology*, Mount Royal and Guilford Avenues, Baltimore, Md., or York Avenue and 66th Street, New York, N. Y.
